

ICS MARS – Single shot set up

Regarding how to modify MARS MOSFET version to only SEMI, you will need to change these two items:

A001ET112	CS4/MX5-P Cut-off Lever Spring
A300EB102	MARS SSS Switch Plate

1. Make sure the hook well fixed on the red mark circle.

2. Install the Cut-Off lever and the spring on the left part of the gear box, please make sure the red mark area, the spring should be hooked on the square part.

3. Assembly and lock the screws, please make sure that the spring cannot be shown outside the Cut-Off Lever.

4. Try to move the Cut-Off Lever, make sure it's smoothly.
